THOMAS G. BRUTON
CLERK, U.S. DISTRICT COURT

**UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF ILLINOIS**

Rose Meacham

Plaintiff

V.

Defendant

Case Number:

Judge:

Magistrate Judge:

Honorable Judge
Alonso

University of Illinois, State of Illinois,
Google, VoN, etc.

People are unable to report Scientific Fraud, Corruption, Threats to People's Lives, etc. due to the retaliation that occurs when people report - and due to the support for the retaliation from dysfunctional, intentionally dysfunctional Academic Systems, Corporate Systems, and Government. As Scientists it is part of our duty and service to the People

Judge:

Magistrate Judge:

to report possible errors with the work we are doing because our work entails medicine, treatments, cures, predictions about our planet and natural phenomena, weaponry, studies of people and more. The products and services we develop with our Scientific work are used by people everyday.

There are people at other places who also say off-record that they want to report errors in the scientific

work, Fraud, etc. but they are unable to do so because it would mean they are "Pushed Out" of their careers, or forced to start their PhD work over again. My case proves that Stephen Bryan at University of Illinois refused to support me through the reporting processes, ~~assisted~~ even though this is part of his job at UI as Dean / Chancellor. Alexis Thompson would

Defendant

Case Number:

Judge:

Magistrate Judge:

not do her job to enable my reports and my case shows she even retaliated against me because of the physical injuries I endured from being physically assaulted by Professor Zofu Cheng, denied services and resources as part of retaliation for reporting. Alexis Thompson targeted and harmed me because of these injuries and my difficulties walking etc. This is so illegal, and yet UI supported this punishment

**UNITED STATES DISTRICT COURT

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

against me for reporting, and
 UI refused to stop these
 retaliatory acts of harm against
 me. The OCR, IDHR, Surgeon
 Generals, Attorney Generals,
 State of Illinois etc. also refused
 to support me and refused to
 stop the Retaliation against me
 for reporting. The Title IX
 office at UI refused to stop
 the retaliation against me,
 refused to correct damages done

**UNITED STATES DISTRICT COURT

Magistrate Judge:

time. Justin Brown, Debra Imel, the OSCR did not allow me to report, retaliated against me while I was trying to report so OSCR could shut down my reports, illegally, while claiming Academic Freedom Laws and VI jurisdiction to do so.

The Illinois Courts are being asked to make a ruling about these illegal acts to shut down and impede ~~the~~ reports, to retaliate

**UNITED STATES DISTRICT COURT

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

against people reporting
Scientific Fraud, Data Fabrication,
Medical Malpractice and more.

Danita Brown Young, UI Chancellor, and
Stephen Bryan, UI Dean/Chancellor,
is refusing to correct the damages
he did to my transcript and
permanent records, - and Stephen
Bryan, Danita Brown Young, are
refusing to issue the Degrees that
I earned, refusing to reinstate
me in my position at UI because
I reported threats to human life and

**UNITED STATES DISTRICT COURT

Magistrate Judge:

Civil, State, Federal/Constitutional Rights \Rightarrow it violates international treaties we have with the entire Scientific Community to inform them when errors are made, follow proper investigative procedures, paper redactions and more. Nobody wants to report these dangers in science because we are punished when we report. The State of Illinois is systemically punishing me with an intentionally and harmful system because dysfunctional

**UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF ILLINOIS**

Plaintiff

V.

Defendant

Case Number:

Judge:

Magistrate Judge:

I followed Mandatory Reporting Laws to report Scientific Fraud, Data Fabrication, Malpractice, Rape/Assault ~~and~~ etc.

This Court Case is the last hope
to correct these harms done
to me, which are illegal -
and to rule in favor of
people who ~~are~~ Mandatorily
Report potential dangers to
Save People's Lives.

Plaintiff

V.

Defendant

Case Number:

Judge:

Magistrate Judge:

The retaliation against me and the internally dysfunctional, accidentally dysfunctional system that supports this retaliation has made me homeless.

Nobody in Illinois cares about these issues enough to help people reporting Threats to Human Life.

People turn me away like I am
a homeless person to be cast
out from society, people watch

**UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF ILLINOIS**

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

as I suffer trying to walk on crutches from the injuries and do not help - do not care. People refuse to hire me for work and fine me because of the injuries Defendants have done to me.

None of the government systems are doing their jobs to correct these issues - each harm requires a separate lawsuit, more time, more money, nothing done. And requires another report - more time, more money, nothing done.

Building owners have attacked me

**UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF ILLINOIS**

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

because they suspect I'm homeless and are prejudiced against poor people and disabled people.

Nobody follows the Bible and even the Churches are not following the Bible (except 2 Catholic Churches and one Christian Mission) when I reach out for help with the situation or help with small things that would make it possible to easily do these reports, lawsuits to regain employment and correct the character defamation, illegal harms to my transcripts etc. preventing

**UNITED STATES DISTRICT COURT

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

me from getting work. Due to the People's own selfishness, greed, malicious hatred and prejudice towards people, sloth, gossip, desire for faster/better/stronger/smarter employees, and merciless etc. people are not able to report these crimes to proper authorities like it specifies in our trainings, contracts, job descriptions we must do to protect people's lives. The People do not care about us reporting and so nobody is able to report - the people do not support us in reporting or thank us, they actually attack us and harm us, joining in the retaliation

Magistrate Judge:

against vs.

The people do not value those who are doing service jobs for them - many it seems do not value service workers because service workers are paid so little. People in America and elsewhere judge people based on how much money they have, the types of awards or test scores they've been given.

People are in competition with one another and the people do not respect or value people who do not compete or who give up money, awards,

Plaintiff

V.

Defendant

Case Number:

Judge:

Magistrate Judge:

positions to help people or try to do something good. The people do not value people who try to do good things unless there is a financial incentive or award given or some type of value exchange or the fulfillment of a sin so it makes it worth it to them for the good deed to be done, or supported.

People seem to only care about what affects them, not what affects other people around them. So as long as people can convince them, they won't be impacted and only other people will be impacted.

**UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF ILLINOIS**

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

the people ~~as~~ will allow it to happen. This is the difficulty with reporting - people do not seem to think it will impact them and so they do not care, and they do not help.

The country seems to be set-up to get the biggest return on investments, with a never ending exponential increase expected from investors on the return they want to receive. I believe this is extremely dangerous for Science, for Medical Research, for Studies of Human Beings. ~~I believe we need to do Human Beings~~

**UNITED STATES DISTRICT COURT

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

Something to fix this and I have tried to help by doing my Duty as an American Citizen to report what is going on... I truly hope that this lawsuit can bring clarity to what the issues are causing ~~the~~ this ⇒ why won't the Professors allow Students / Employees to report Fraud etc. ? What are the Professors afraid of happening when the reports are filed and people investigate ? Why don't the Professors report errors etc. themselves - are the investigations done horribly ? Are the consequences unfair to the professors ? Why doesn't the Scientific Community publish and

**UNITED STATES DISTRICT COURT

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

find and award Studies where the hypothesis is not proven, or there are no statistically significant results but the study is extremely interesting, well conducted, insightful and is still relevant to the scientific community. Why is everyone so obsessed with being "right" in science or being "smart"? what happens if the scientists make a mistake or if they are wrong? Perhaps the entire system of reporting, investigating, and handling Scientific Fraud, Data Fabrication, Malpractice,

**UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF ILLINOIS**

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

or errors and mistakes needs to be redone so people can actually use this system and so researchers, professors, are also happy with the system and willingly participate or report on their own. Maybe the public perception needs to change within the Scientific Community and the competition needs to be constrained and ~~not~~ maybe we should not reward competition in science anymore \Rightarrow I thought that science is a global community of intelligent, well-intentioned, good

**UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF ILLINOIS**

Plaintiff

v.

Defendant

Case Number:

Judge:

Magistrate Judge:

Inquisitive people who are working together as a global community to understand the world we live in and to improve our own lives, together. I thought that we are supposed to be sharing our work with other scientists... these new Company, Corporate /Academic Collaborations are odd and I would like the Courts to please help rule on whether I have a Right to publish my Academic Internship Results from my own Intellectual Property or not...

and whether or not University of Illinois broke the laws in the ways I was retaliated against for reporting, or whether that is their Academic Freedom Rights to usurp Federal Mandatory Reporting Laws, the Constitution and Civil, State Laws, And whether Google, etc., the Companies have the rights to simply take my IP without following Scientific Publishing Rules or our Academic Agreements, to use my IP for-profit in products I have not approved and services I do not support \Rightarrow for things that violate my moral, ethical, and religious beliefs.

Both the Academic Institutions and the Corporate Institutions are illegally misusing their internal systems to block,

impede, destroy reports from people within the organizations trying to protect people's lives \Rightarrow this is illegal and I hope the courts will rule on the evidence I present in court, which will prove this is occurring and will also hopefully show people how allowing this to happen to people reporting risks your lives as well. Our jobs are extremely important and Human Resources at companies, schools - Deans offices, Chancellors, Provosts, Lawyers for Companies and Schools, Title IX, etc. need to understand that they are currently shutting down reports to save people's lives by attacking reporters as if they are "legal liabilities". I hope that people will work together to fix these reporting systems and to realize that this is

much more than just "legal liability" or money, or awards \Rightarrow these reports are crucial to keeping people safe and I hope people will stop trying to play with laws designed to save their lives, and stop trying to get away with finding "loopholes" in the laws to justify "pushing-out" or "Blacklisting" people from their careers when ~~this~~ this is actually extremely illegal and actually risks people's lives because our jobs are so important.

I hope the Misclassification of full-time employees as "Students" will stop so people within schools understand that we are in need of different university reporting systems that actually take the reports seriously and don't brush us aside as a student trying to get out of homework

by reporting (my case shows evidence the people accused of allowing Scientific Fraud to occur defended themselves by claiming I was "evading academic responsibility" ~~the~~ \Rightarrow evidence Supbeana).

I hope that this has presented the issues, the Federal Questions and extreme law violations, and the resolutions I am seeking, detailed in my last submission's to your Honour at the Courthouse.

I will have a laptop again this week, thanks to the kindness and donation of a nice store owner - and I am more than happy to type these statements to make it easier to read, and properly edit things so the documents are presented in an easier to read manner.

I thank you for reading everything and I hope to meet in-person to answer questions and discuss the case.

I am not asking for money.

(If there is a mandatory \$1 fee that I need to request than I will do so and donate it to Charity immediately).

I am not pressing charges or asking for anything to happen to the Defendants.

I do not want anything to happen to Defendants.

I am asking that Google explain exactly the value that my IP served in the development and production of Google Products and Services, working out the percentage impact. Preferably this is a new technology defining these rules legally is important - and VoN is probably a part owner of these products and services as well.

I am asking Google allow VoN and myself to please publish our results and project that used my IP because it is crucial to my Academics and career.

I am asking that the Courts rule on whether or not the retaliatory grades and character defamation at Google is legally protected - and I am asking Google to please issue a statement that I was "engaged with my studies" during our Academic Project, which started December 2015.

I am asking that UoN please accept this statement and the Court evidence about the sexual harassment, Mandatory Reports, etc. that should be factored into assessing whether or not I was engaged with my studies during the Google Academic Internship - I am hoping my record could be corrected with the British Home Office so people know I was working extremely hard and had actually finished 2 papers by the end of Freshman Year, was offered 2 Internships (Microsoft and Google) and I was even nominated for Scholarships, etc.

(UI)

I am asking University of Illinois to please issue the grades I earned, which are being withheld from my Transcripts and permanent records.

I am asking UI to please issue the degrees that I earned.

I am asking for UI to please erase the Character Defamation and retaliation from my records at UI.

I am asking to please be reinstated in my position at UI or elsewhere so I can finish my work and my Thesis can be formally accepted please.

(And previous submissions)
